

“It’s been a real game-changer for us. We’re now producing aggregates and sands that are 10% derived from recycled concrete from demolition waste.”

TRANSFORMING WASTE

Complete C&D Solutions For Constructing A Sustainable Future

McLanahan offers industry-leading solutions for construction and demolition waste recycling. Offering complete systems from crushing and screening to washing and tailings, McLanahan helps producers recover aggregate from construction and demolition waste streams, minimizing the amount of material destined for landfills and transforming it into a valuable resource.

Whether you’re starting a new C&D operation or interested in adding to your current operation, McLanahan solutions are tailored for your unique operation.

Increase production, efficiencies and profit while decreasing waste in landfills and working towards a more sustainable future with McLanahan.
